

How to Clean your Four Hitter

It's easy simple and takes about 2 minutes

1. Unscrew the mouth piece using care that the spring does not shoot away when you do.
2. Drop the mouth piece and the spring in a shot glass of rubbing alcohol.
3. Push on the end of the tube and the burning chamber will come out the other side.
4. Wipe off the burning chamber and tube with a cotton ball soaked in alcohol.
5. If desired you can run a pipe cleaner through the tube.
6. Wipe off main body with cotton ball soaked in alcohol.
7. Insert wet cotton ball into burning area and twist the body while holding the cotton ball.
8. Remove cotton ball and re-assemble
